ERGO COMPARISON CHART

AF8-ERGO, MH860-ERGO, AFM8-ERGO

The new ERGO crimp tool series is an ergonomically optimized upgrade to legacy models, and includes the AF8-ERGO, MH860-ERGO, and AFM8-ERGO. These tools maintain the same trusted military qualifications, performance, and reliability users have long relied on, while introducing customer-driven enhancements to improve the technician experience. Key improvements include ribbed, contoured grips, an improved handle span, and dual-sided selector visibility, all designed to reduce hand fatigue and enhance ease of use. Built for precision, the tools crimp contacts ranging from 32–12 AWG. The ERGO series is also fully compatible with DMC's existing turrets and positioners, allowing for seamless integration into current workflows.

	ERGO	LEGACY
REDUCED HANDLE SPAN	✓ 32% Reduction in AF8-ERGO	✗
LESS CRIMP FORCE	✓ Avg. 20% Reduction in AF8-ERGO	✗
ERGONOMIC CONTOURED GRIPS	✓	✗
DUAL-SIDED SELECTOR SETTING VISIBILITY	✓	✗
MIL-SPEC QUALIFIED	✓	✓
INTERCHANGEABLE TURRETS/POSITIONERS	✓	✓
